

## Adding an Enhanced Email Signature

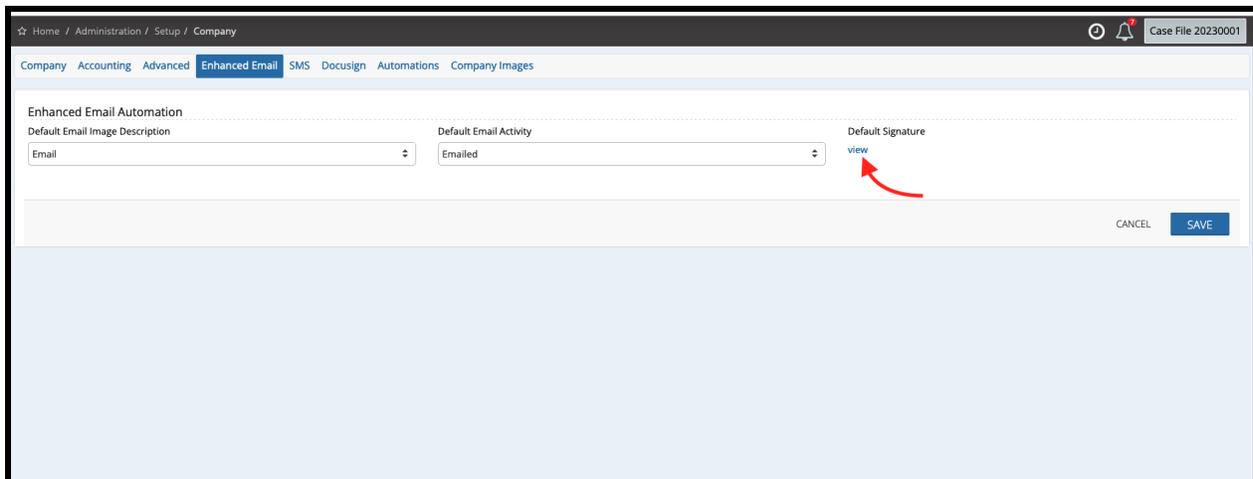

### Overview

This document details how to add a signature in CMPOnline used when sending an email with the Enhanced Email add-on. This document details two areas where you can configure this signature, the default signature and the user's personalized signature.

### Setting the Default Signature

If you have a default signature you wish to be used throughout your company, you may set the template for that under the company settings. **Please note though, users will still have to follow the steps below for setting up their individual signatures.**

- Navigate to Administration > Set Up > Company > (Enhanced Email).
- Click “view” under Default Signature.

## Adding an Enhanced Email Signature

---

- Populate the text box with the default signature you wish to use. This can be a mix of text you wish the user to change and text you wish to keep as seen below.

casemasterpro.com', '123 Main Street', 'Gainesville, Florida 12345', and 'Case Master Pro'. A 'Close' button is located at the bottom right of the dialog." data-bbox="170 240 820 569"/>

**Edit Email Signature**

Email Signature

**Full Name**  
Position  
(098) 765-4321 | [casemasterpro.com](http://casemasterpro.com)  
123 Main Street  
Gainesville, Florida 12345  
**Case Master Pro**

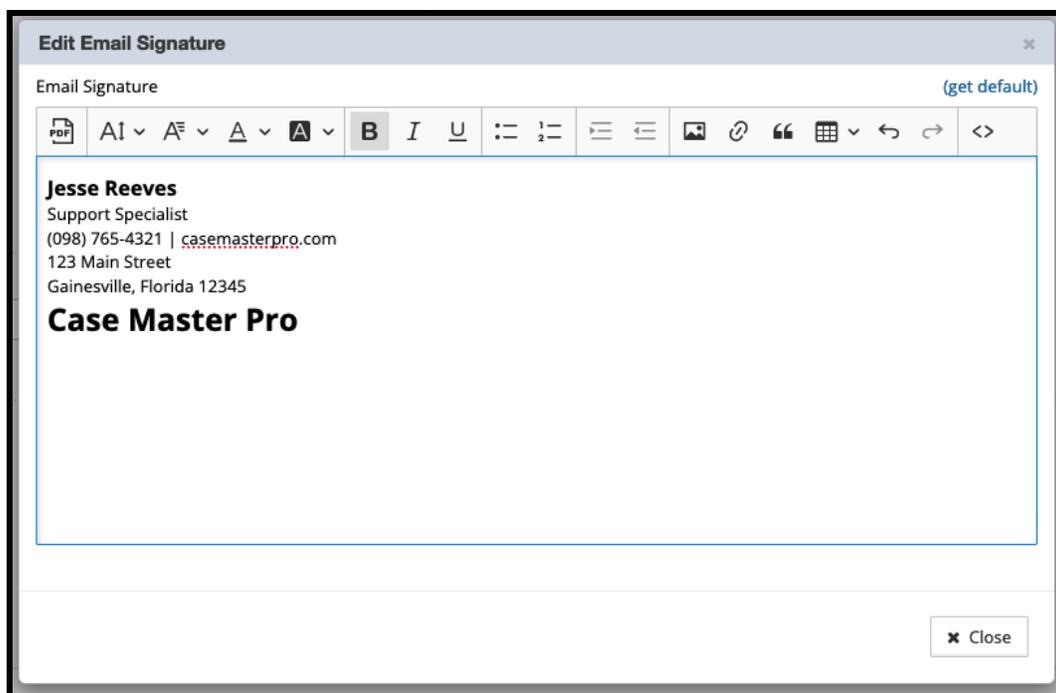

Close

- Once done, close and click Save.

## Adding an Enhanced Email Signature

### Setting User Signatures

- Navigate to User Preferences.
- Click “view” under the Enh. Email Signature section.
- If your company has set up a default signature, as seen above, click (get default) and change the text as needed.
- If your company has not set up a default signature, begin to create your signature as needed.

- Click close, then click Save.
- Now, once you begin to write an email using the enhanced email automation feature, this will automatically populate for you.
